

# GateHouse Logistics Raises the Bar in Secure Data Sharing

*Data unifier introduces ghShare to improve and simplify secure data sharing between carriers and shippers; add-on module to secure data sharing service ghTrack*

NØRRESUNDBY, DENMARK, February 15, 2018 /EINPresswire.com/ -- Logistics data unifier and aggregator GateHouse Logistics A/S today raises the bar in secure data sharing for the connected supply chain with the launch of a new cloud portal that improves and simplifies the way logistics data is shared between carriers and shippers.

The new module ghShare is another module of GateHouse Logistics' data sharing service ghTrack. It improves and greatly simplifies control of secure data sharing for both carriers and shippers. ghShare allows quick and easy online data sharing control and speeds up significantly the onboarding of new carriers and their assets by streamlining and automating the invitation flow.

ghTrack is today the most secure data sharing and distribution service in Europe and is compliant with the General Data Protection Regulation (GDPR).

Thousands of independent carriers use the ghTrack service each day to share key logistics data with their customers. The new add-on module ghShare provides carriers with full control of their assets. The registration and data sharing on ghTrack is free charge for carriers. The company recently opened operations in the US.

“

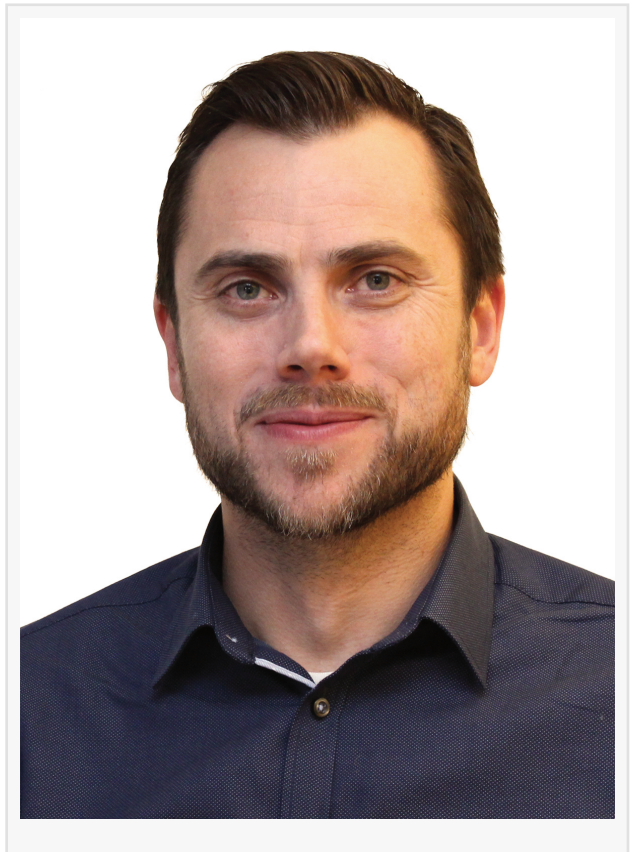

The new ghShare tool is another step towards logistics data nirvana.”

*Jesper Bennike,*

“GateHouse Logistics' developers are tasked with constantly seeking ways to help carriers and shippers to better control the flow of data in the supply chain and bring about the industry-wide logistics connected era,” says Jesper Bennike, CEO GateHouse Logistics. “This new ghShare tool is another step towards logistics data nirvana.”

## About GateHouse Logistics A/S

GateHouse Logistics A/S is leading the way that data is securely shared across the entire supply chain, bringing with it much-needed transparency of inbound and outbound logistics. GateHouse champions data sovereignty at the global level and users of our unique data aggregation services are the world's leading transport companies, automotive and retail/wholesale companies and manufacturers. Our smart groundbreaking ghTrack® service is truly hardware agnostic and

compatible with all telematics systems. Singularly, ghTrack transforms data from all diverse telematics systems into one logical data stream that can be easily integrated into any business system. Visit [www.gatehouselogistics.com](http://www.gatehouselogistics.com).
