

# Second Trial Data Report: Clinical Substantiation for CVR Medical

VANCOUVER, BRITISH COLUMBIA, CANADA, March 7, 2018 /EINPresswire.com/ -- CVR Medical Corp. (TSX.V: CVM) (FRANKFURT: B3BN) (OTCQB: CRRVF) ("CVR Medical") advisory staff member Dr. Phillip J. Bendick, PhD, has completed his second clinical report summarizing additional data collected from tertiary clinical trials for the Carotid Stenotic Scan (CSS) device. His report confirms the evaluation stated in the prior report, issued in September 2017, which predicted improved accuracy in the ability to identify the narrowing of arteries.

In commenting on the report, evaluating 295 Carotid Arteries within tertiary clinical trials, Dr. Bendick states, "Internal re-evaluation of the tertiary clinical data for the Carotid Stenotic Scan (CSS) using the latest software has shown significant improvement in the ability to accurately differentiate carotid arteries without stenosis versus those with clinically important atherosclerotic disease."

Dr. Bendick elaborates, "In the current device, we were able to continue to improve the quality of placement metric through the enhanced user interface, significantly refining the CSS's level of accuracy. Within the upper and lower ranges of acceptable data as defined by the improved software, the CSS concurred with Duplex Doppler Ultrasound 235 times out of 295 total tests (lower threshold) and 255 times out of 263 (upper threshold)." Dr. Bendick goes on to explain, "The CSS is currently in pivotal clinical trials as of March 5, 2018. The data collected in these trials align with our plans for expansion of a patient database, increasing the number of carotid arteries with clinically important narrowing, providing data for rigorous testing of the software's accuracy and efficacy."

Data from current pivotal trials at all locations will be used for clinical substantiation of CVR's upcoming FDA submission.

This press release contains forward-looking information that involves various risks and uncertainties regarding future events related to the Joint Venture. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements and are not guarantees of future performance of the Company. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits the Company will obtain from them. These forward-looking statements reflect management's current views and are based on certain expectations, estimates and assumptions which may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements, including: (1) a downturn in general economic conditions in North America and internationally, (2) the inherent uncertainties and speculative nature associated with commercialization of technology and the practice of medicine, (3) a change in health regulations, (4) any number of events or causes which may delay or cease commercialization and development of the Joint Venture, (5) the risk that the Company or the Joint Venture does not execute its business plan, (6) inability to retain key employees, (7) inability to finance operations and growth, and (8) other factors beyond the Company's control. These forward-looking statements are made as of the date of this news release and, except as required by law, the Company assumes no obligation to update these forward-looking statements, or to update the reasons why actual results differed from those projected in the forward-looking statements.

THE TSX VENTURE EXCHANGE INC. HAS NEITHER APPROVED NOR DISAPPROVED THE CONTENTS OF THIS PRESS RELEASE. NEITHER THE TSX VENTURE EXCHANGE NOR ITS REGULATION SERVICES PROVIDER (AS THAT TERM IS DEFINED IN THE POLICIES OF THE TSX VENTURE EXCHANGE) ACCEPTS RESPONSIBILITY FOR THE ADEQUACY OR ACCURACY OF THIS RELEASE.
