

# Ensure Emergency Storm Equipment Reliability

*Ensure Reliability of Ice and Snow Storm  
Emergency Generators, Snow Blowers,  
Chainsaws and other Equipment*

FORT LAUDERDALE, FLORIDA, US,  
March 13, 2018 /EINPresswire.com/ --  
Ensure Reliability & Performance of  
Emergency Storm Equipment

As storms sweep across the country, bringing extreme rain and snow conditions, crippling highways and stranding people at home or work, it is critical to make sure that snow blowers, generators, chainsaws and other gas-powered emergency storm equipment is ready to use at a moment's notice. Star brite's Star Tron Enzyme Fuel Treatment is what professionals and first

responders rely upon to make sure their engines start up right away when they are needed, especially if they have been idle for months at a time. The unique formula allows for a more complete burn of the fuel charge to ensure easy smoke-free starts, maximum power and improved fuel economy. Today's fuels can begin to degrade and form gums in as little as 30 days, causing engines to be difficult to

start. The proprietary blend of enzymes break apart and disperse gums and other solids throughout the fuel, keeping carburetors and fuel injectors fully-functional and clean. Fuels attract water which degrades overall quality and can lead to phase separation; Star Tron's enzymes also break apart clusters of water molecules into submicron-sized droplets that can safely be eliminated as the engine operates.

Star Tron is also a powerful fuel stabilizer, keeping stored fuel fresh for up to two years. Star Tron is ideal for use in all engines, from the smallest gas-powered outdoor equipment to

cars, trucks, boats and more.
