

Rose Cruz Plasma Pen Pro (PPP) Training Program Opens The Door To Business Owners Using New Skin Tightening Technology

Plasma Pen Pro (PPP) Fibroblast treatments are now all the rage for Men and Women who wish to have tighter, blemish-free, skin.

TORONTO, ONTARIO, CANADA, March 13, 2018 /EINPresswire.com/ -- Finding solutions to skin lines, wrinkles, discoloration, and other problems can be a huge challenge for a great many people. Unfortunately, many of the solutions on the market deliver less than ideal results. The good news is a new technology, [plasma skin tightening](#), is making waves and with the correct training, certification, and equipment, it opens the door to not just happier people with better skin, but impressive income opportunities for plasma pen practitioners. Leading the way in [Plasma Pen Pro](#) Training and Certification is acclaimed Master Trainer Rose Cruz, who recently announced upcoming dates for the three-day hands-on instruction both in her hometown of Toronto and in Gold Coast, Australia. Cruz has been taking her Plasma Pen Pro Training and Certification program across the globe, where it has been met with nothing but excitement and enthusiasm.

"I love to teach plasma lift, plasma skin tightening, plasma pen training because I get to see first-hand all the time the joy it delivers to people who finally have found a way to fill out their skin lines, lose blemishes, and just appear more youthful," remarked Cruz, well-known as a leader in the industry. "I look forward to certifying more professionals across the world, since it has the dual benefit of teaching people a way to develop new streams of income, along with helping the people they end up treating feel better about their appearance."

Plasma Pen Pro training and certification opens the door to being able to deliver one of the newest and most talked about treatments in the beauty industry. It's non-invasive, non-surgical, and the patient is left with no bruising or scarring. The results delivered by plasma fibroblast treatments are immediate and generally exceed expectations. The process works through the plasma pen applying an electric charge, or arc, on the surface of the skin, which transmits heat through the area treated. Plasma skin tightening and plumpening follows.

Plasma Pen Pro Eyelift Before and After Results

Reviews of the three-day Plasma Pen Pro Training and Certification program have been extremely positive.

Julie S., from Toronto, recently said, "I have always wanted to work for myself and taking the plasma pen training from Rose Cruz put me in the perfect position for this. Now I'm doing very well and my clients are all pleased with the treatments. Five stars all the way."

With a variety of new Plasma Skin Tightening training programs coming up, it is important for each new student to do their homework and find out how long the trainer has been training, but more importantly, how many treatment have they conducted. Often times, student whom have just been trained and have little to no real client experience start training others in order to profit. "It is very simple to find out if a trainer is experienced in Plasma" says Rose Cruz who has been training students for under a year, but has conducted hundreds of Plasma Skin Treatments to date, "take a look at their instagram and see how many REAL pictures of plasma treatments are under there. As well, call and speak to the person that will be training you. Can they answer all your questions about the plasma? Are they willing to have you come in for a demo? Can you see the school or clinic? If you simply get a bad feeling about a training program, then do some more research until you find the right one."

Plasma Pen Pro sister company [Second Skin Medspa](#) has been open for over 10 years, and is also a very successful business, and Rose Cruz hopes to help other practitioners learn the art and science of Plasma so that each student can add this skin treatment to their menu, and not only profit from it, but help those men and women concerned about their skin, wrinkles, moles, skin tags, etc, and help them increase their body image and self esteem.
