

Welcome to the dark side [with 'Obsidian' from Isomorphic Software].

Isomorphic Software – provider of the most advanced platform for building progressive web apps – announced a new skin ('Obsidian') included in Release 12.

SAN FRANCISCO, CA, UNITED STATES, March 19, 2018

/EINPresswire.com/ -- OK, I am just gonna say it: Enterprise web applications are boring. If, like me, you want to spice it up and build something a little edgier, look no further than [Isomorphic Software](#)'s new Obsidian skin. Obsidian is like a cross between the Empire Strikes Back and a Prada suit: It's dark, mysterious, and incredibly hip.

Mirroring Isomorphic's 'Tahoe' skin, Obsidian is flat and modern, but the similarities end there. Obsidian is dark, dark black. It has hints of blue and grey to draw your eye to any web app's important features. Bright colored charts pop against the dark background. It truly is a thing of beauty.

Experience the [live Obsidian Showcase here](#). Welcome to the dark side.

“

With Release 12, developers AND end-users become highly-productive. It takes progressive web apps to the next level.”

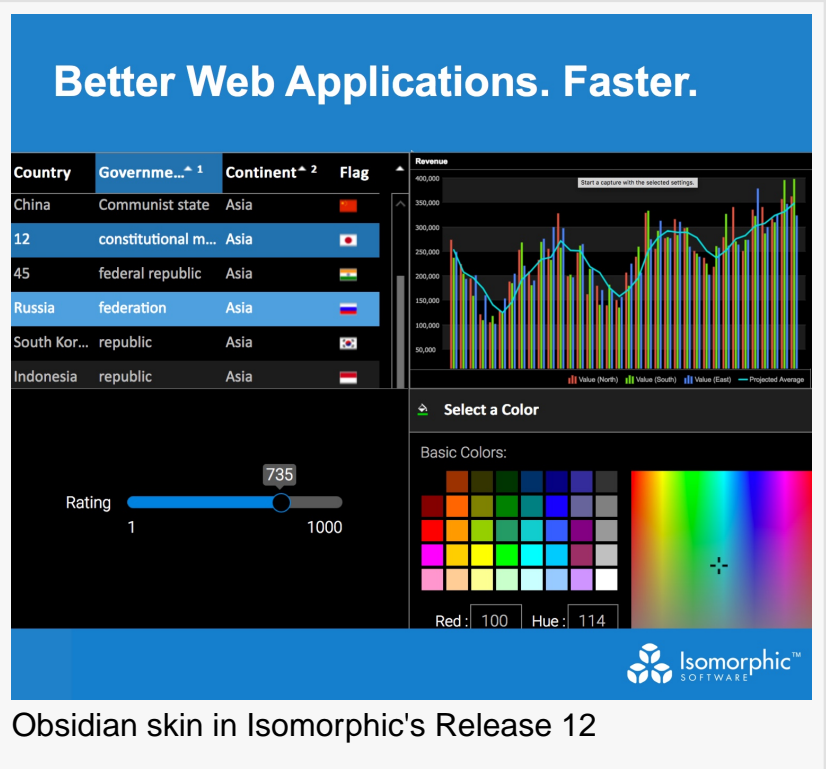

Charles Kendrick, CTO of Isomorphic Software

Isomorphic Software's [Release 12](#) will be available later this month and is a major upgrade for Isomorphic's SmartClient and Smart GWT technologies. Release 12 enables developers to build high-quality, high performance web apps faster; End-users to become even more productive; and it offers no-compromise UI - regardless of the device you choose (desktop, tablet or smartphone).

With this major release, a whole host of new features will be added, including: Dynamic properties | SASS templates |

Microsoft surface/mixed input support | Show/hide icons on focus | Highlighting pending values | Frozen columns with vertical autosizing | Obsidian skin | Stratus skin | WebSockets Support in RTM | Tree picklists for SelectItem | TypeScript support | Selenium 3.0 support and more.
