

CSZ Testing Laboratory Expands Capabilities to Better Serve Customers

High-Performance Temperature & Humidity Test Chamber Provides More than Added Capacity

CINCINNATI, OHIO, UNITED STATES, April 23, 2018 /EINPresswire.com/ -- [CSZ Testing](#) is pleased to announce the addition of our new high-performance test chamber. The new chamber, with 44 cu.ft. of space for product and estimated ramp rates of up to 30°C/min, will not only increase capabilities for customers with larger products, lot sizes, or performance demands, it will also allow the test lab to be more responsive to testing project requests.

“Our test lab receives more requests for temperature and humidity testing than any other service we offer. The expansion of our capacity in this discipline is more than just an added chamber. It’s also about the chamber we added,” said Cherilyn Sandman, CSZ Testing Assistant Lab Manager. “This new ZP-44 is a brand new product from our CSZ Industrial division, specifically designed to offer more cooling capacity without the need for LN2. The impact will be direct, immediate, and will really help accelerate our schedule and reduce lead times for temperature and humidity testing.”

“

...more cooling capacity
without the need for LN2”
Cherilyn Sandman

Until the addition of the new ZP-44 test chamber, the largest Z-Series test chamber available for use by the test lab was a 32 cu.ft. model. The new chamber will accompany the existing equipment in CSZ’s Cincinnati test laboratory and is scheduled to be installed and ready to use by early-May,

2018.

About CSZ

CSZ, A Gentherm Company, Testing division is A2LA accredited and ITAR registered to provide environmental simulation testing. Operating out of two locations, Cincinnati, OH and Sterling Heights, MI, CSZ Testing is a leading provider of testing services in the Midwest United States.
