

Adaptive Computing Changes Product Name from “Moab” to “Moab Cloud for the HPC Suite”

The name change more accurately describes the product’s new capabilities.

NAPLES, FL, UNITED STATES, July 12, 2018 /EINPresswire.com/ -- [Adaptive Computing](#) Enterprises, a world leader in dynamically optimizing large-scale HPC computing environments, announced that it has changed the name of its flagship software product “Moab” to “[Moab Cloud for the HPC Suite](#).” The new name more accurately reflects the product’s additional cloud-bursting capabilities.

For more than 10 years, administrators have relied on Moab more than any other HPC workload management solution because of its demonstrated ability to optimize scheduling and accelerate the workload productivity of their systems. It is currently in use at the largest and most complex high-performance computing environments in the world, including many leading commercial and innovative research HPC systems.

Moab Cloud for the HPC Suite adds a new level of benefits for HPC ecosystems by combining the time-tested elements of Moab with advanced cloud-bursting capabilities. The new solution can “burst” additional workloads to an external cloud on-demand. It is easy to use, manage, and configure and integrates with on-premise resources. It offers full stack provisioning, is automated, and is very cost-effective for customers.

“

More than 2400 companies are interested in our Moab Cloud Solution, and we’re performing several Test Drives of the product every week”

Arthur Allen, President & CEO, Adaptive Computing.

Adaptive Computing Enterprises was acquired in September 2016 by software mogul Arthur L. Allen, a long-time industry veteran who has been creating software companies and technology solutions for 40 years. The company has been totally transformed through millions of dollars of investment in

development, taking Moab to the next level. Adaptive Computing will continue to lead the market through product innovation, product quality and extraordinary customer support.

“More than 2400 companies are interested in our Moab Cloud Solution, and we’re performing several Test Drives of the product every week,” Allen said.

Combining the capabilities of public clouds with on-premise infrastructure brings unparalleled flexibility and scalability to the business. Moab Cloud for the HPC Suite has evolved into the premiere, best-in-class solution offering increased agility, cost reduction and unprecedented productivity.

About Adaptive Computing

Adaptive Computing manages some of the world's largest computing installations. Our leadership in IT decision engine software has been recognized with over 45 patents and over a decade of battle-tested performance resulting in a solid Fortune 500 and Top500 supercomputing customer base.

Adaptive Computing's mission is to bring higher levels of decision, control, and self-optimization to the challenges of deploying and managing large and complex IT environments, so they accelerate business performance at a reduced cost.
