

Printek Launches NEW 3" Mobile Thermal Printer Series

Rugged "Super Industrial" Mobile Thermal Printers Engineered for Demanding and Challenging Environments.

ST. JOSEPH, MICHIGAN, UNITED STATES, November 20, 2018 /EINPresswire.com/ -- St. Joseph, MI — PrintekMobile, an industry leader in the field of reliable, innovative, on-

the-go rugged mobile printers, has announced the launch of its newest printer, the FieldPro530si Mobile Thermal Printer Series. The FP530si "super industrial" [Mobile Thermal Printers](#) offer reliable operation and a wide range of valuable features. With a rugged case and shock mounts, FP530si Mobile Thermal Printers are engineered to operate flawlessly day after day, which creates a greater Return on Investment ("ROI"). FP530si Mobile Thermal Printers have become the solution of choice for harsh environments, demanding applications, and fast changing needs of businesses where a 3" wide receipt or label is needed.

“

We are very excited to release an updated version of the previous MtPsi Series Mobile Thermal Printers that provides users a rugged portable printer the works where most printers would fail.”

Chris Yeager

The FP530si Mobile Thermal Printers are a variant of Printek's popular FP530 Series Printers, replacing the successful MtP300si Printers with extended durability and specifications for the most challenging printing applications imaginable. Running battery-free and mounted to a fixed structure in industrial, construction, or manufacturing vehicles, FP530si Mobile Thermal Printers

operates reliably under severe conditions not typically associated or compatible with the use of hardened standard mobile printers.

This battery-free Mobile Thermal Printer has an internal DC voltage regulator with a wider input voltage range than provided by standard vehicle printers. Also available for the FP530si Series Mobile Thermal Printers is either a standard Serial interface for RS-232C or USB communications (optional cable required). The printer may also be equipped with an optional Bluetooth, or Wi-Fi interface. A wide variety of mounting options from RAM Mounts and others are available as well to help with ease of installation in vehicles, fork lifts, and more.

“We are very excited to release an updated version of the previous MtPsi Series Mobile Thermal Printer that provides users the ability to have a mobile printer in an environment where most printers would fail” states Chris Yeager, Director of Marketing at Printek, LLC.

As PrintekMobile continues to develop and release new mobile thermal printers into the market, the FP530si Mobile Thermal Printer is sure to be a welcomed 3" printer for those looking for a workhorse. To download a brochure of the NEWFP530si Mobile Thermal Printer, please visit:
